

Milestone 2: System Design & ServiceNow Flow Implementation

Artifact: sys_remote_update_set_7a14952683238710667ea9e0deaad3f2.xml

1. Data Model & Dictionary Specification

Custom Table: Incident WorkFlow (u_incident_workflow)

Field Label	Element Name	Data Type	Choices / Reference
Number	u_number	String (40)	Auto-generated prefix 'INC'
Caller	u_reference_1	Reference	sys_user (Student / Staff)
Short Description	u_short_description	String (100)	Primary text for keyword parsing
Description	u_description	String (4000)	Detailed incident description
Category	u_category	Choice	network, hardware, access, performance
Subcategory	u_subcategory	Choice	wi-fi, projector, forgot password, slow computer
State	u_state	Choice	new, in progress, on hold, resolved, closed
Assigned Group	u_assigned_group	Reference	sys_user_group (Resolver Group)
Assigned To	u_assigned_to	Reference	sys_user (Support Engineer)

2. Flow Designer Logic Specification

Flow Name: Auto Classify School IT Tickets | **Sys ID:** ec6b056283ef4710667ea9e0deaad3f1

Trigger Condition: Record created on table u_incident_workflow with u_category == null.

- Decision Branch 1 (Network Issues):** If short_description contains 'wifi' or 'network' → Set Category = Network, Subcategory = Wi-Fi, Assigned Group = Network Support.
- Decision Branch 2 (Hardware Faults):** If short_description contains 'projector' or 'hardware' → Set Category = Hardware, Subcategory = Projector, Assigned Group = Hardware Support.
- Decision Branch 3 (Access & Login):** If short_description contains 'password' or 'login' → Set Category = Access, Subcategory = Forgot Password, Assigned Group = Service Desk.
- Decision Branch 4 (System Performance):** If short_description contains 'slow' or 'computer' → Set Category = Performance, Subcategory = Slow Computer, Assigned Group = IT Systems.
- Action: Send Email:** Sends notification email to current.u_reference_1.email containing ticket ID, category, and assigned group details.

3. Security & Access Control (ACLs)

- Role created: u_incident_workflow_user granting end-users self-service submission rights.
- Record-level ACLs enforce read/write policies ensuring students view only their own logged tickets.

- Integrated self-service password reset process: pwd_process_4ff0c881bf220100710071a7bf0739fa.
