

Milestone 3: Testing, Validation & Deployment Guide

Project: Auto Classify School IT Tickets | Deliverable: Test Suite & PDI Setup

1. Test Case Execution Results

Test ID	Test Description	Sample Short Description	Classified Group	Result
TC-01	Wi-Fi network drop	Wi-Fi not working in Lab 3	Network Support	PASS
TC-02	Classroom projector issue	Projector lamp blinking red in 204	Hardware Support	PASS
TC-03	Portal password lockout	Forgot password for student marks	Service Desk	PASS
TC-04	Workstation slowdown	Computer Lab workstation 14 slow	IT Systems	PASS
TC-05	Caller email notification	Incident created triggers sys_email	Email Delivered	PASS
TC-06	ACL Role validation	Role u_incident_workflow_user check	Access Granted	PASS

2. ServiceNow PDI Deployment Steps

Step 1: Log in to ServiceNow Personal Developer Instance (PDI) at developer.servicenow.com.

Step 2: Navigate to **System Update Sets** → **Retrieved Update Sets**.

Step 3: Under Related Links, click **Import Update Set from XML** and upload `sys_remote_update_set_7a14952683238710667ea9e0deaad3f2.xml`.

Step 4: Click **Preview Update Set**, verify 0 collisions, then click **Commit Update Set**.

Step 5: Navigate to `u_incident_workflow.list` to verify tables and active Flow Designer automation.

3. Interactive Web Demo Deployment

A fully functional HTML/CSS/JavaScript web demo is included in the project repository. It features:

- Real-time classification simulation matching the ServiceNow Flow logic.
- Interactive Kanban Workspace board organized across New, In Progress, On Hold, Resolved, and Closed states.
- Flow Designer Node Visualizer with interactive execution animation.
- Hosted live on GitHub Pages: <https://kanagarajperumal0-sys.github.io/tnskill/>
